

# Environmental Policy Statement

Continuing our passion and commitment to shaping a greener environment through our actions, for future generations

We're committed to support Nottingham's ambition to become the UK's first sustainable carbon neutral city by 2028. As a leading live entertainment, conference and events venue and centre of excellence for ice sports, and to support Nottingham's pledge, we will manage the environmental impact of our venue with a focus on:

Reducing electricity, water, paper and heating resources

Eliminating the majority of single use plastics

Identifying our pathway to carbon neutrality

Reducing general waste from site

Increasing the percentage of waste recycled or reused

We will comply with environmental legislation and regulation and implement policies, processes, and a positive, environmentally aware culture to help us meet these obligations.

This policy statement will be reviewed annually to ensure that it remain appropriate in a continually changing environment.

Martin Ingham  
Chief Executive
